

Bicuspid Aortic Foundation Fifth Annual Conference

**Health Conference Center
Torrance Memorial Medical Center
3330 Lomita Boulevard
Torrance, California**

October 1 - 2, 2010

Understanding Thoracic Aortic Disease

Millions of Americans are born with the most common of all heart defects: bicuspid aortic valves. Today we know that they, as well as others in their families with tri-leaflet aortic valves, are included among those with Thoracic Aortic Disease (TAD).

Many other individuals and families with various genetic or acquired conditions are also affected by TAD.

Understanding TAD includes many topics:

Heart valves, aneurysm, dissection, blood pressure

Genetics

Echocardiogram, MRI, CT

Surgery

We'll be talking about all this and more!

Please join us Friday afternoon and Saturday in Torrance.

All sessions are open to the public, but seating is limited.

For reservations, call (888) 310-4673 or (949) 495-0027

or email contactus@bicuspidfoundation.com.
